

PALEO

The histogram displays the frequency of correct answers for 200 students. The x-axis, labeled 'Number of correct answers', ranges from 0 to 200 in increments of 20. The y-axis, labeled 'Frequency', ranges from 0 to 100 in increments of 10. The distribution is unimodal and slightly right-skewed, with a peak frequency of approximately 95 at 10 correct answers. The frequency decreases as the number of correct answers increases, with a small secondary peak around 130-140 correct answers.
